

# COORDINATION AND PROJECT MANAGEMENT

---

TRADE4SD needs an effective project management to meet its objectives. This work package aims to coordinate and manage the consortium in order to be in line with the scope and expected impacts of the Call. The project size and complexity require strong management and coordination. In order to ensure the success of TRADE4SD, the management will be (1) flexible to remain relevant in all external events, thereby also contributing to effective civil society dialogue; 2) strong enough to ensure the success of the project in terms of the work plan and in line with EC rules; and (3) transparent in order to enable fair and clear decisions and decision making processes. This WP is designed to ensure an efficient and effective project management. UNIKENT will continuously support CORVINUS in strategic management and steering based on their extensive knowledge and experience in this field.

Corvinus University is Hungary's most eminent educational institution in the fields of Economic, Management and Social Sciences. The Department of Agricultural Economics and Rural Development was the first in Hungary in providing degree programme for agricultural economists, which has maintained in normal and correspondence forms for decades.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 101000551
