Outline

1. Excellence

2. Impact

3. Implementation

4. Today's agenda

1. What is it all about?

- Relationships between trade and sustainability
- The premise of TRADE4SD is that trade has the power to produce positive outcomes when policies are designed in a sustainable way
- Trade has an important role to play in achieving the SDGs
- Addressing the relation between trade and SDGs requires an integrated approach to policy-making and inclusive governance

1. What are the objectives?

- **Identify a system of relevant indicators** of direct and indirect linkages between SDGs and trade, and trade policies, and a **clear understanding of the determinants of participation** of developing countries in local and global agri-food value chains (WP1).
- **Provide a structured review** of how SDGs are currently included in trade rules (WP2).
- Measure the links between trade, trade policies and sustainability at a global level via elaborating a new and **robust sustainability toolbox integrating econometric and SDGs indicators** (WP3).
- **Provide context-specific case studies** of selected agri-food value chains in relevant EU trade partners in Asia and Africa (including coffee, cocoa, rice and olive oil) (WP4).
- **Analyse the coherence of the current EU trade-related policies** (trade, CAP, energy, climate, bioeconomy, nutritional) in view of their impacts on trade and SDGs (WP5).
- **Identify options for improving the sustainability impacts of EU trade policy** and provide evidence-based policy recommendations, paying particular attention to the WTO gap regarding sustainability (WP6).
- **Facilitate the science-to-society dialogue** through a continuous involvement of relevant actors and the use of active dissemination and communication strategy, including online conferencing and social media networks (WP7).
